Part 8 - South Circular Road to City Centre Active Travel Scheme

Supporting the proposal

Caibidil: Chapter 3 - Appropriate Assessment and
Environmen...

I wish to register my support for the proposed S.C.Rd to City Centre Active Travel Scheme. If plans like this do not proceed then Limerick will be condemned to a future of car-based gridlock. We are already way behind what enlightened European cities are doing to facilitate and promote Active Travel and, as a result, incremental steps such as this proposal are the best we can do for now. Climate change demands even more radical actions but every small step will help.

Main opinion:

The plan must go ahead.

Main requests:

Planners must take bold steps.

Main reasons:

To improve the city and to help fight climate change.
