Stádas: Submitted

Aighneacht:

Support of South Circular Road to City Centre active travel scheme

Comhairliúchán:

Part 8 - South Circular Road to City Centre Active Travel Scheme

The archaic opinion of Limerick citizens being given far too much consideration

Caibidil: Chapter 3 - Appropriate Assessment and
Environmen...

To strive towards a greener, sustainable, and regenerative city, we can't seriously even entertain ideas of objection of the literal bare minimum with regards to cycle lanes. Congested, car centric cities don't work. It's not a secret. So when peoples objections to positive initiatives like this are entertained than it is damaging to this cities future.

Why shouldn't Limerick act as a leader in a greener future and not trail behind so embarassingly?

Main opinion:

Cycles networks literally only have positive impacts, they are good.

Main requests:

Make more cycle lanes.

Main reasons:

Because cycling is good for peoples health, the environment, and makes more desirable spaces in the city.
