All, all utilities shown on this plan have been surveyed using approved detectors between inspection chambers, if unable to be detected, are generally assumed to be indications to the contrary. The detection confidence for each utility segment is PAS128 scheme outlined below. Information depicted as QL-C or QL-D cannot be based on historic utility records which can be inaccurate and incomplete.

Surveyed may reflect the routes of multiple cables or pipes. It is not always possible to identify construction features, utilities and other subsurface linear features therefore features shown are not utility related, and due to the limitations of electromagnetic identifications should be treated with caution and verified prior to use during

buried pipes, cables and ducts can be detected and mapped in consideration of material type, geology and proximity to other utilities. Even an appropriate and survey may not be able to achieve a 100% detection rate. Where an area of client project requirements, it is strongly recommended that a PAS128 Quality Survey is carried out

Survey can be considered a 100% accurate depiction of the sub-surface environment, drawings does not remove the requirement for the use of safe digging techniques at operations undertaken on site are to be in accordance with HSA Code of Practice for Underground Services 2016.

This figure is a detailed topographic survey map, likely created using Global Navigation Satellite System (GNSS) technology. The map displays a variety of features including roads, paths, stone walls, fences, buildings, and utility infrastructure. Key elements include:

- Roads and Paths:** Labeled "Road" and "Path" in several locations, often marked by dashed lines or specific symbols.
- Stone Walls:** Numerous stone walls are shown as thick black lines, particularly along the left side and in the upper left quadrant.
- Fences:** Various types of fences are depicted, including "F.F.L.", "EXPOSED", "Ridge", "Containers", and "Steel Platform" fences.
- Buildings:** Several buildings are shown with hatching patterns, labeled "Building", "Fire Station", and "House".
- Utilities:** Utility lines are color-coded and labeled with codes such as CL54.58 MH C10, CL54.46 MH S23, and CL54.14 MH C25. These lines include labels like "FROM DRAIN", "FROM BUILDING", and "STREAM".
- Landmarks:** Landmarks include "Monument" (54.28), "Grotto" (54.51), "Flower Beds" (54.51), "Light NOT A LIGHT" (54.51), "T Sign" (multiple locations), "LS" (multiple locations), "FH" (multiple locations), "WM" (multiple locations), "EOT", "EXPOSED", "EXPOSED LINE ENTERS BUILDING", "EXPOSED LINE GOES UNDER CONTAINER", "EXPOSED ON FENCE", and "EXPOSED ON TANK".
- Streams:** Two streams are labeled: "UNABLE TO CLIP LIGHT NO ACCESS AS IT IS CAGED OFF" and "APPROX LINE OF UNDERWATER STREAM".
- Vertical Labels:** Numerous vertical labels are present along the left edge, ranging from 54.07 at the bottom to 54.16 at the top. Other labels include 54.29, 54.30, 54.31, 54.32, 54.33, 54.34, 54.35, 54.36, 54.37, 54.38, 54.39, 54.40, 54.41, 54.42, 54.43, 54.44, 54.45, 54.46, 54.47, 54.48, 54.49, 54.50, 54.51, 54.52, 54.53,
